## #Pascalcollection Design Marco Acerbis

La collezione Pascal esplora il mondo dei metalli che lavorati, piegati e plasmati conferiscono un senso di piacevole morbidezza ed inaspettata leggerezza. Lamiere lavorate ricordano delle vele gonfiate dal vento. L'aspetto tattile del prodotto è curato nel dettaglio: il bracciolo in legno, lo scalda e lo rende piacevole al contatto.

**Pascal collection explores the world of metals that once worked, folded and shaped, can give a sense of pleasant softness and unexpected lightness. The worked metal sheets remember the sails swelled by the wind. The tactile aspect of the product is studied in every single detail: the wooden armrest, warms and makes the collection pleasant.**

## #Cottagecollection Design Ramón Esteve

Lo spirito rustico viene reinterpretato cercando la sintesi formale del mobile contemporaneo. Il risultato è una proposta di arredi da esterno in cui materiali come l'alluminio e i tessuti tecnici convivono con quelli più tradizionali come la corda, stabilendo relazioni emotive con la mente dell'utente finale.

The countryside mood is redesigned aiming at searching the formal synthesis of the contemporary furniture.

The result is a proposal of outdoor furniture pieces, where materials such as aluminum and technical fabrics coexist with more traditional ones such as the rope, that emotionally connect user's mind.

## #Cleo collection // TEAK Design Marco Acerbis

Le parole chiave della collezione "Cleo" si possono riassumere in volume, forma ed equilibrio. È una composizione che facilmente si declina in modi diversi ma sempre con un senso di calma, eleganza e semplicità. L'equilibrio si fonda principalmente sulla contrapposizione tra il divano, dal carattere rigido e geometrico, e la morbidezza delle sedute lounge. La famiglia è ampia e comprende anche molti altri complementi che si uniscono al gioco quotidiano di un arredo che risponde alle sensazioni dell'utilizzatore in modo dinamico ed allegro.

**Volumes, shapes and balance are the key elements of Cleo collection. It is a composition of objects that can be arranged in multiple layouts but always maintaining a sense of calm, elegance and simplicity. The balance between the rigid, geometrical but flexible shape of the sofa finds its counterpart in the softness of the lounge chairs. The family comprises also many other different elements that freely take part in a play between characters that shall easily and happily respond to any mood of your day.**

## #Sohocollection Design Marco Acerbis

Nel dare vita alla collezione Soho Marco Acerbis si è ispirato alla delicatezza e all'equilibrio dei materiali: la corda che si sussegue e si incontra con i listelli di legno crea una rete elegante e visivamente morbida che rimanda al mondo della nautica. La collezione è un gioco tra i vuoti e i pieni, tra la bidimensionalità della struttura e il volume dei cuscini.

Marco Acerbis for his Soho collection has been inspired by the delicacy and the synergy among materials: the rope follows and joins up the wood batten creating an elegant and a visibly flexible net that harks back to the nautical world. The collection is a mix of full and empty spaces and two-dimensional frame and cushions' volumes.

## #Milocollection Design Marco Acerbis

Eleganza romantica, attenzione ai dettagli, la collezione Milo è costruita sartorialmente come un abito.

Toccare è permesso, anzi, è obbligatorio. Questo il concept intorno al quale ruota il progetto di Marco Acerbis. Il risultato finale è una famiglia di oggetti che hanno tutti un animo forte, pur inserendosi nell'arredo senza arroganza.

La linea è morbida ma rigida, colorata ma con equilibrio, moderna ma senza tempo.

**Romantic elegance. Attention to details. Tailored as a perfect dress. Touching is allowed, no, it is compulsory. This are some of the ideas that Marco Acerbis kept in mind while sketching this collection. The result is a very lively family of objects that have a strong character and yet do know their place without being too arrogant. It is soft yet rigid, colorful but with balance, modern but timeless.**

## #Floatcollection Design Karim Rashid

Un prodotto italiano dall'ispirazione egiziana del suo creatore Karim Rashid, per un salotto comodo ed elegante. Le linee dritte, pure, creano con intelligenza e gusto pieni e vuoti piacevoli, che si alternano in uno stile leggero e raffinato. Seduta e schienale fluttuano quasi nel vuoto. La struttura è concepita in modo che la base, più stretta sia epurata all'estremo e lasci il centro dell'attenzione sulla seduta generosa e piacevole, bella da ammirare e confortevole. Questo salotto è concepito per arredare con eleganza e per affascinare, senza nulla togliere all'aspetto pratico e funzionale.

# Materials

Alluminio: Grazie alla fusione di più leghe di alluminio che ne garantiscono solidità, maneggevolezza ed inattaccabilità alla ruggine, è un materiale di elevata qualità e permette di raggiungere i massimi risultati qualitativi ed estetici.

Inox: L'acciaio inossidabile è un materiale che, grazie alla sua alta resistenza alla corrosione e alle caratteristiche meccaniche di rilievo, risulta maggiormente duraturo e affidabile nel tempo.

Acciaio: Lega di ferro e carbonio con percentuale di carbonio inferiore al 2% trattata per resistere agli agenti atmosferici con il processo della cataforesi e verniciatura a polvere.

Manutenzione: Per mantenere a lungo il prodotto in buone condizioni, consigliamo una corretta pulizia periodica, particolarmente frequente in località caratterizzate da forte umidità e clima marino. Si raccomanda di pulire le superfici con un panno morbido utilizzando acqua o detersivi neutri. Prolungate ed ininterrotte esposizioni a intense radiazioni UV o a temperature molto rigide possono incidere sulle caratteristiche iniziali del rivestimento estetico colorato costituito da poliestere. Consigliamo di pulire e conservare in luoghi riparati i prodotti durante periodi d'inutilizzo prolungato e invernali.

Aluminum: Thanks to the fusion of several aluminum alloys that guarantee solidity, manageability and rust resistance, it is a material of high quality and allows to reach the maximum qualitative and aesthetic results.

Inox: Stainless steel is a material that, thanks to its high resistance to corrosion and to the mechanical characteristics of relief, is more durable and reliable over time.

Steel: Iron and carbon alloy with carbon percentage less than 2% treated to resist to the atmospheric agents with the cathoresis process and powder coating.

Maintenance: To keep the product in good condition for a long time, we recommend a regular cleaning period, particularly frequent in places characterized by high humidity and marine climate. We recommend cleaning the surfaces with a soft cloth using water or neutral detergents. Prolonged and uninterrupted exposures to intense UV radiation or at very low temperatures can affect the initial characteristics of the colored polyester coating. We recommend cleaning and storing products in sheltered areas during long periods of non-use and winter.

## Legni / Wood

Iroko

Teak naturale  
Natural Teak

Stonewood

Teak: Materiale di elevata qualità ideale per la realizzazione di mobili da esterno perché estremamente resistente ai cambiamenti di temperatura, all'acqua, all'umidità e alla salsedine.

Iroko: Particolare tipo di legno dotato di numerose proprietà meccaniche, fisiche e tecnologiche: la capacità di opporsi alle sollecitazioni esterne e l'attitudine a lasciarsi lavorare nonostante la sua durezza. La particolare stabilità e la medio-alta durezza conferiscono a questo legno una buona resistenza alle deformazioni e ne garantiscono una durata nel tempo davvero eccellente.

Stonewood: Per la sua pregiatezza e le sue particolari caratteristiche tecniche si presta agli usi più diversi, ma sempre in contesti di altissima qualità. In particolare, viene preferibilmente impiegato di preferenza per la creazione di mobili di pregiata fattura. Legno compatto, facile nella lavorazione, non scheggia, è leggero, di color bruno-rossastro, di odore aromatico perché contiene un olio essenziale caratteristico ricco di canfora.

Trattandosi di un materiale naturale si potrebbero osservare variazioni di colore o anche crepe dovute al grado di umidità ed ai bruschi cambiamenti di temperatura. Qualora non ricevesse alcun trattamento di manutenzione, mediante l'applicazione periodica di comuni e specifici protettivi a base olio, la superficie potrebbe prendere una patina grigio argento che potrà essere eliminata con una leggera carteggiatura superficiale e successiva lucidatura con panno di iuta. Piccole macchie superficiali dovute ad olio o altri prodotti alimentari dovranno essere rimosse tempestivamente, prima che il legno possa assorbirle in profondità, carteggiando la superficie interessata e lucidandola successivamente con un panno di iuta.

Teak: High quality material suitable for outdoor furniture because it is extremely resistant to changes in temperature, water, humidity and saltiness.

Iroko: particular type of wood with numerous mechanical, physical and technological properties: its resistance to external stress and workability despite its hardness. The particular stability and medium-high hardness give this wood a good flexural strength resistance to deformation and guarantee excellent durability.

Stonewood: thanks to its high quality and its particular technical characteristics it can be employed in many different ways, but always in very high quality contexts. In particular, it is preferably used for the creation of high-quality furniture. Compact wood, easy to process, does not splinter, it is light, reddish brown, it has an aromatic smell because it contains a characteristic essential oil rich in camphor.

Being a natural material, colour variations or even cracks due to the degree of humidity and sudden changes in temperature may be observed. If no maintenance treatment is received, through the periodic application of common and specific protective oil-based, the surface may take a silver-gray patina that can be easily removed with a light surface sanding down and subsequent polishing with a jute cloth. Small superficial stains due to oil or other food products must be removed promptly, before the wood can absorb them in depth, sanding down the affected surface and then polishing it with a jute cloth.

Una delle pietre più pregiate e maggiormente impiegate in outdoor è sicuramente il marmo.

Il marmo, grazie alla sua particolare composizione e natura, è una pietra poco porosa e poco assorbente, durezza e resistenza, fanno del marmo una tra le pietre più pregiate e durevoli nel tempo.

La formazione del marmo avviene mediante un processo metamorfico di cristallizzazione: il carbonato di calcio, venendo in contatto con le rocce sedimentarie, dà vita ad un insieme di cristalli di calcite e minerali vari, i quali ne determinano il colorito.

Per mantenere la lucentezza del marmo e del granito è necessario detergere giornalmente le superfici: è sufficiente diluire il sapone neutro in acqua tiepida.

Le superfici dovranno essere strofinate per mezzo di una spugna o un panno morbido. Sarà sufficiente risciacquare con un panno umido, prestando attenzione a non lasciare i fastidiosi aloni di detergente.

Marble is certainly one of the most precious and used stones for the outdoor.

Marble, thanks to its particular composition and nature, is a little porous and not absorbing stone, hardness and resistance, making marble one of the most precious and durable stones in time.

The marble formation takes place by means of a metamorphic crystallization process: calcium carbonate, coming into contact with the sedimentary rocks, gives rise to a set of crystals of calcite and various minerals, which determine the complexion.

To maintain the shine of marble and granite it is necessary to clean the surfaces daily: it is sufficient to dilute the neutral soap in warm water.

The surfaces must be rubbed with a sponge or a soft cloth. It will be sufficient to rinse with a damp cloth, being careful not to leave detergent stains

Il gres porcellanato, grazie alle sue eccellenti proprietà fisiche e meccaniche, risulta essere ideale per uso esterno, essendo inattaccabile dagli agenti atmosferici e inalterabile ai raggi UV. Tale materiale viene ottenuto tramite il processo di sintetizzazione di argille ceramiche, feldspati, caolini e sabbia.

Per la pulizia dei piani in gres si consiglia l'utilizzo di un panno inumidito con acqua e detergente neutro da risciacquare ed asciugare con un panno asciutto. Nella fase di lavaggio porre particolare attenzione al fine di evitare l'accumulo di sporco o calcare.

Porcelain stoneware, thanks to its excellent physical and flexural strenght, turns out to be ideal for outdoor use, being unaffected by atmospheric agents and unalterable to UV rays. This material is obtained through the synthesis process of ceramic clays, feldspars, kaolins and sand.

For the cleaning of stoneware tops it is advisable to use a damp cloth with water and a neutral detergent to be rinsed and dried with a dry cloth. During the washing phase, pay particular attention to avoid the accumulation of dirt
